4. THE IMO'S ASSESSMENT AND DECISION

4.1.1. Submissions

As a result of the submissions received during the consultation period, the Commission has identified a number of issues that need to be addressed in the proposed amendments to the Code.

The Commission has also identified a number of issues that need to be addressed in the proposed amendments to the Code. The Commission has identified a number of issues that need to be addressed in the proposed amendments to the Code.

The Commission has identified a number of issues that need to be addressed in the proposed amendments to the Code. The Commission has identified a number of issues that need to be addressed in the proposed amendments to the Code.

(a) to promote the economically efficient, safe and reliable production and supply of electricity and electricity related services in the South West interconnected system;

(b) to ensure that the market is open to all participants and that the market is operated in a way that is consistent with the objectives of the Act and the Regulations;

(c) to avoid discrimination in that market against particular energy options and technologies, including sustainable energy options and technologies such as those that make use of renewable resources or that reduce overall greenhouse gas emissions;

(d) to ensure that the market is operated in a way that is consistent with the objectives of the Act and the Regulations;

(e) to minimise the long-term cost of electricity supplied to customers from the South West interconnected system;

(f) to ensure that the market is operated in a way that is consistent with the objectives of the Act and the Regulations;
