Details of the proposed Market Rule Change

- 1) Outline the issue concerning the existing Market Rules that is to be addressed by the proposed Market Rule change:

1. The issue is that the existing Market Rules do not adequately address the need for a more robust and transparent market structure. This is particularly evident in the area of order matching and execution, where the current rules can lead to inefficiencies and potential market manipulation. The proposed Market Rule change aims to address these issues by introducing a new order matching algorithm and enhancing the transparency of the market's order book.
