provided under the current Market Resource Schedules, generally not require either Resource Plan or Dispatch instructions required and

- The proposed amendment to the Resource Plan will require the MO to publish as Restricted information any related information it receives from system Management.

3. CALL FOR SUBMISSIONS

PLEASE NOTE: This section is now out of date. The IMO did not extend the first submission period.

A system manager shall accept request for Commissioning test, unless the required information is provided in the request or the conduct of the test of the proposed time would pose a threat to Power system security or Power system Reliability or

(c) ~~the system is in a state of emergency~~ ~~since the relevant generating system is first connected to the grid for testing purposes as specified in the information submitted to system manager under section A4.~~

A system manager may not accept request for Commissioning test for facilities that are yet to commence operation, if the information provided in accordance with section A4 includes a finding, undertaken after the commencement of the finding by commencing on the date specified in accordance with section B4(c)(iii), or is revised in accordance with section A4 or section D4.

A system manager shall provide the MO the information related to proposed Commissioning tests specified under section A4.

4. Subject to section 4.4 any initial Reserve Capacity Obligation Quantity set in accordance with sections 4.4 or 4.4 B4 is to be reduced once the Reserve Capacity Obligations take effect as follows.

(a) if the aggregate Market Equilibrium quantity of Capacity Credits is modified from time to time under the Market Rules for a city is less than the Certified Reserve Capacity for that city, any time for a period of rest of the application of section 4.4 or section 4.4, then the MO shall reduce the Reserve Capacity Obligation Quantity to reflect the amount which the aggregate Capacity Credits is short of the Certified Reserve Capacity.

(b) subject to section 4.4, during a finding, where there is a consequential outage or a planned outage for a city provided to the system manager in accordance with section 4.4, the MO shall reduce the Reserve Capacity Obligation Quantity for that city, after taking into account any demands in accordance with section 4.4, to reflect the amount of Capacity Credits available to that outage.

(c) if the facility scheduled Generation, which for the purposes of section A4 has undergone significant interference, is subject to Commissioning test during a finding, then the Reserve Capacity Obligation Quantity for that city shall be zero during that finding.

4. The MO shall calculate the Forced Outage refund for each Facility. **Facility Forced Outage Refund** is the lesser of,

a. the so-called "ding, nter" set in "ding Month" of the product of,

i. the Off-Peak "ding, nter" Rate or Peak "ding, nter" Rate determined in accordance with the Refund Rate applicable to "ding, nter" period

ii. the Forced Outage hours in "ding, nter" period.

where the Forced Outage hours for Facility is equal to,

i.

The MO must set the classes of confidentiality status for the following information under the Restricted Information and the MO must make this information available from the Market Website.

any information on Disputes in progress that may impact other Rer Participants

Schedules of Planned Outages

the current Dispatch Merit Order

audit reports and

documentation of the functionality of

any software used to run the Reserve Capacity Auction

the EM Auction software and

the settlement system software and

information supplied under the Auction system Management related to the approved Commissioning tests

5. ABOUT RULE CHANGE PROPOSALS

Market Rules of the Market Rules provides that any person, including the MO may make a Rule Change Proposal competing Rule Change Proposal. For details visit this to the MO

The MO will assess the proposal and, within Business Days of receiving the proposal for, will notify the proponent whether the proposal will be progressed further

In order for the proposal to be progressed the change proposal must be in accordance with the Market Rules to better contribute to the achievement of the Market Objectives. The Market Objectives are:

- a to promote the economically efficient, safe and reliable production and supply of electricity and electricity related services in the South West Interconnected System
- b to encourage competition among generators and retailers in the South West Interconnected System, including facilitating efficient entry of new competitors
- c to avoid discrimination in that it is not to discriminate against energy options and technologies, including supporting energy options and technologies such as those that use renewable resources or that reduce or offset greenhouse gas emissions
- d to minimise the long term cost of electricity

to encourage the signing of contracts to purchase the amount of electricity needed when it is used

A Rate Change Proposal can be processed through the standard Rate Change Process or a Fast Track Rate Change Process. The standard process involves a 60-day public comment period, while the fast track process involves the MO consulting with Rate Participants who either advise the MO that they wish to be consulted or the MO considers it in their interest in the change.
