### Submission

---

---

**1. Please provide your views on the proposal, including any objections or suggested revisions**

LGP supports the Rule Change on the grounds that aggregation of separate facilities does not impact the contribution of those facilities to the requirement for spinning reserve.

---

---

**2. Please provide an assessment, whether the change will better facilitate the achievement of the Market Objectives**

LGP supports Griffin's contention that the rule change advances Market Rules a)(economically efficiency) and d) (minimise the long-term cost of electricity) by avoiding increasing the costs of aggregated facilities when they do not increase the market costs.

---

---

**3. Please indicate if the proposed change will have any implications for your organisation, (for example changes to your IT or business systems) and any costs involved**

LGP would incur no organisational costs as a consequence of adopting the change.

**4. Please indicate the time required for your organ**

LGP would be able to implement this Rule Change immediately.
