

Noise Regulations fact sheet

R 11: B

2021

Purpose

The Noise Regulations 1997 (N.R. 1997) are designed to protect workers from the risks to their health and safety from noise and vibration. The Regulations apply to all workers in the UK, including those in the construction industry. The Regulations are designed to ensure that workers are not exposed to noise levels that could cause them to become deaf or suffer other health problems. The Regulations also require employers to take steps to reduce the noise levels in the workplace and to provide workers with information and training about the risks of noise.
