generation as this reduces the total overall demand for energy storage and is likely significantly cheaper.

Comparing Renewables and Storage

When renewables are not available directly and electrical storage has been drawn down. Policy should be technology-agnostic and aimed at incentivising development of the best long-duration energy storage solutions over the right timeframe. This will promote the most economically efficient generation as this reduces the total overall demand for energy storage and is likely significantly cheaper.

4. Greater safety risks
